Requirements for verifying your identity under the new Anti Money Laundering (AML)/Counter Terrorism Financing (CTF) Act

The new AML/CTF Act cameinto effect on the 12th December 2007. All financial planning and fund management companies are now required to collect, verify and store specific customer information before arranging certain services such as managed investments for a client. It is designed to prevent, detect and protect Australian business from money laundering and the financing of terrorist activities.

We are currently in a transition phase and as such whilst most companies will not accept any new business without a person identity being verified, there are a number that still do not. To avoid confusion, we request that all new applications are sent with 'certified documentation'.

We've found that the easiest way to provide the required documentation is to have a copy of your driving licence or passport certified by Australia Post or a Justice of the Peace (please see following page for a full list of individuals that can certify documentation).

Once this has been completed, under the current requirements we will not require you to send identification again.

What you need to do

You will need to enclose a certified piece of photographic evidence or one piece of primary non-photographic evidence and one piece of secondary evidence (please refer to the Identification Form for document requirements), with your application form and post to us at the following address

Please do not send us original driving licences or passports as these can very easily get lost in the post. Copies of documents can be certified by an authorised individual, they will need to sight and verify that the copy is a 'certified true copy', sign, date, print their name and list their qualification.

Section 2: Details of Capital Series *Trio*

The details of Capital Series *Trio* are provided below and in Part 1 of this PDS. Please read Part 1 of this PDS.

2.1 What is Capital Series *Trio*?

Capital Series *Trio* is an investment which aims to provide investors with capital growth and the potential for income over a term of 5.5 years (i.e. 5 ½ years). Capital Series *Trio* offers investors the choice of up to three different Strategies:

Strategy 1 offers:

- exposure to the Australian share market via the S&P/ASX 200 Index;
- capital protection at maturity of 100%;
- potential for capital growth of up to 70% at maturity; and
- the potential for income over the term of the investment which is contingent on the price performance of the S&P/ASX 200 Index.

The Underlying Portfolio for Strategy 1 comprises one Reference Asset, which is the S&P/ASX 200 Index. The S&P/ASX 200 Index is a share market index comprised of 200 of the largest listed companies in Australia by market capitalisation.

Strategy 2 offers:

- exposure to Gold;
- capital protection at maturity of 100%;
- potential for capital growth of up to 70% at maturity; and
- the potential for income over the term of the investment which is contingent on the price performance of Gold.

The Underlying Portfolio for Strategy 2 comprises one Reference Asset which is Gold. Gold is a precious metal which, for many centuries, has been used as money, a store of value and in jewellery. Gold may also be considered as a diversifier within an investment portfolio. The price of Gold is quoted in US dollars, however there is no direct currency risk as the Investment is denominated in Australian Dollars.

Strategy 3 offers:

- exposure to the Chinese market via the Hang Seng China Enterprises Index, the Taiwanese share market via the TAIEX Index, and the Korean share market via the KOSPI 200 Index;
- capital protection at maturity of 80%; and
- unlimited potential for capital growth at maturity.

Strategy 3 does not offer the potential for income over the term of the Investment.

The Underlying Portfolio for Strategy 3 comprises three Reference Assets; the Hang Seng China Enterprises Index, the TAIEX Index and the KOSPI 200 Index. This Underlying Portfolio will have the following weightings:

Reference Asset	Weighting
Hang Seng China Enterprises Index	40%
TAIEX Index	30%
KOSPI 200 Index	30%

Please refer to Section 3 in Part 2 of this PDS for more information on the three Strategies.

Capital Series *Trio* is a deferred purchase agreement. For more information, please refer to Section 1.14 “What kind of structure is Capital Series?” in Part 1 of this PDS.

Section 2: Details of Capital Series *Trio* (cont).

2.2 What are the features of Capital Series *Trio*?

Investment Term	The term of Capital Series *Trio* is 5.5 years (subject to clause 13.15 of the Terms of Sale).
Capital Protection	The three Strategies available under Capital Series *Trio* offer different levels of capital protection. In respect of Strategy 1, 100% of the Strategy Investment Amount is protected only at maturity, as described in Part 1 of this PDS. In respect of Strategy 2, 100% of the Strategy Investment Amount is protected only at maturity, as described in Part 1 of this PDS. In respect of Strategy 3, 80% of the Strategy Investment Amount is protected only at maturity, as described in Part 1 of this PDS. For more information, please refer to Section 1.5 "What is capital protection and how does it work?" in Part 1 of this PDS.
Potential for capital growth	**Strategy 1** offers exposure to the S&P/ASX 200 Index, up to a maximum of 70% above the Initial Reference Level at maturity. This means the maximum return you can receive on your Investment at maturity will be 70% (excluding any coupon payments you may also receive during the Investment Term). If the S&P/ASX 200 Index increases by more than 70% before maturity, your Investment does not terminate. In determining the Maturity Value of your Investment, the level of the S&P/ASX 200 Index is only relevant on the Start Date and the Observation Date. **Strategy 2** offers exposure to Gold, up to a maximum of 70% above the Initial Reference Level at maturity. This means the maximum return you can receive on your Investment at maturity will be 70% (excluding any coupon payments you may also receive during the Investment Term). If Gold increases by more than 70% before maturity, your Investment does not terminate. In determining the Maturity Value of your Investment, the price of Gold is only relevant on the Start Date and the Observation Date. **Strategy 3** offers unlimited exposure to any increase above the Initial Reference Levels at maturity of the Hang Seng China Enterprises Index, the TAIEX Index and the KOSPI 200 Index, subject to the relevant weightings for each Reference Asset (i.e. 40% weighting for the Hang Seng China Enterprises Index, 30% weighting for the TAIEX Index and 30% weighting for the KOSPI 200 Index). This means there is no specified maximum return for your Investment at maturity. In determining the Maturity Value of your Investment, the level of each Reference Asset is only relevant on the Start Date and the Observation Date. The Initial Reference Level for each Reference Asset is the Reference Level of the Reference Asset on the Start Date as determined by the Calculation Agent, in its discretion.
Coupon payments	Coupons are payable in relation to Strategy 1, based on your Strategy Investment Amount. The coupons are contingent on the performance of the S&P/ASX 200 Index on the Coupon Observation Dates in the table below. This means that you will participate in 100% of the Reference Asset Return for each Strategy. The Reference Asset Return is the percentage change in the Underlying Portfolio over the term of the Investment which is limited to a maximum amount for Strategy 1 and Strategy 2. Underlying Portfolio	Strategy Investment Amount protected at maturity	Potential for capital growth	Coupon Payments	Investment Term
S&P/ASX 200 Index	100%	Up to 70% above the Initial Reference Level	5.00% starting from Year 1.5 subject to the performance of the S&P/ASX 200 Index	5.5 years

Strategy 1 offers capital protection of 100% of the Strategy Investment Amount at maturity and aims to provide Investors with exposure to the performance of the S&P/ASX 200 Index. This exposure is limited to a maximum level of 70% above the Initial Reference Level at maturity. If the S&P/ASX 200 Index increases by more than 70% before maturity, your Investment does not terminate. In determining the Maturity Value of your Investment, the level of the S&P/ASX 200 Index is only relevant on the Start Date and the Observation Date.

Strategy 1 also offers the potential for coupon payments over the Investment Term. Coupons are payable based on your Strategy Investment Amount. Coupons are contingent on the performance of the S&P/ASX 200 Index on the Coupon Observation Dates in the table below. If the performance of the S&P/ASX 200 Index does not meet the required hurdle on any Coupon Observation Date, that coupon will not be paid on the Coupon Payment Date and will not be carried forward to any future date.

Year	Coupon Observation Date	Coupon
Year 1.5	4 May 2011	A 5.00% coupon is payable on the Coupon Payment Date if the Reference Level of the S&P/ASX 200 Index on the Coupon Observation Date is at or above 110% of the Initial Reference Level
Year 2.5	4 May 2012	A 5.00% coupon is payable on the Coupon Payment Date if the Reference Level of the S&P/ASX 200 Index on the Coupon Observation Date is at or above 120% of the Initial Reference Level
Year 3.5	6 May 2013	A 5.00% coupon is payable on the Coupon Payment Date if the Reference Level of the S&P/ASX 200 Index on the Coupon Observation Date is at or above 130% of the Initial Reference Level

In these examples you would be reliant on us – Commonwealth Bank – to meet our obligations, which are unsecured.

Assume that you invest $100,000 in Strategy 1 and the Initial Reference Level for the S&P/ASX 200 Index is 3,750. In this example assuming the Reference Levels shown below, you would receive coupon payments as follows:

Coupon Observation Date	Reference Level of S&P/ASX 200 Index	Coupon payment

Section 4: What happens at maturity?

At maturity, the Maturity Value of your Investment is calculated and you can choose to either:

(a) accept physical delivery of the Delivery Parcel, or

(b) receive the Sale Proceeds from the sale of the Delivery Parcel using our Delivery Asset Sale Service.

Please refer to Section 1.12 "What are my options at maturity?" in Part 1 of this PDS for more information.

The following sections provide information about how the Maturity Value of your Investment is calculated.

4.1 Calculating the Strategy Portfolio Return

The levels used in these examples are for illustrative purposes only and do not represent, and should not be taken to represent, our view of what the levels on those days might be, or what you should expect the levels to be on those days, or the manner in which the levels might move between those days. In these examples you would be reliant on us – Commonwealth Bank – to meet our obligations, which are unsecured.

The Maturity Value of your Investment is the sum of the Strategy Maturity Value for each Strategy you choose to invest in.

The Strategy Maturity Value is determined using the Strategy Portfolio Return that is calculated for each Strategy you choose to invest in. The Strategy Portfolio Return is calculated differently depending on the Strategy. The examples below demonstrate how the Strategy Portfolio Return is calculated.

Strategy 1

On the Maturity Date, the Strategy Portfolio Return is calculated in accordance with the steps set out below.

Example 1

(assumes an increase in the Underlying Portfolio of less than 70%)

Step	Example
Step 1: The Initial Reference Level of the S&P/ASX 200 Index is determined on the Start Date.	3,800
Step 2: The Final Reference Level of the S&P/ASX 200 Index is determined on the Observation Date. The Final Reference Level is the Reference Level of the S&P/ASX 200 Index on the Observation Date, as determined by the Calculation Agent in its discretion.	6,139
Step 3: The Reference Asset Return is calculated. The Reference Asset Return is the lower of: (a) (Final Reference Level – Initial Reference Level) / Initial Reference Level (expressed as a percentage) = (6,139 – 3,800) / 3,800 = 61.55% and (b) 70.00% In this example, the Reference Asset Return is **61.55%**	61.55%
Step 4: The Strategy Portfolio Return is calculated, which is the Reference Asset Return multiplied by the Participation Rate. This can be expressed by the formula: Reference Asset Return x Participation Rate (expressed as a percentage) In this example, the Strategy Portfolio Return is **61.55%** (61.55% x 100%)	61.55%

Section 4: What happens at maturity? (cont).

Example 2

(assumes an increase in the Underlying Portfolio of more than 70%)

Step	Example
Step 1: The Initial Reference Level of the S&P/ASX 200 Index is determined on the Start Date.	3,800
Step 2: The Final Reference Level of the S&P/ASX 200 Index is determined on the Observation Date. The Final Reference Level is the Reference Level of the S&P/ASX 200 Index on the Observation Date, as determined by the Calculation Agent in its discretion.	6,670
Step 3: The Reference Asset Return is calculated. The Reference Asset Return is the lower of: (a) (Final Reference Level – Initial Reference Level) / Initial Reference Level (expressed as a percentage) = (6,670 – 3,800) / 3,800 = 75.53% and (b) 70.00% In this example, the Reference Asset Return is **70.00%**	70.00%
Step 4: The Strategy Portfolio Return is calculated, which is the Reference Asset Return multiplied by the Participation Rate. This can be expressed by the formula: Reference Asset Return x Participation Rate (expressed as a percentage) In this example, the Strategy Portfolio Return is **70.00%** (70.00% x 100%)	70.00%

Strategy 2

On the Maturity Date, the Strategy Portfolio Return is calculated in accordance with the steps set out below.

Example 3

(assumes an increase in the Underlying Portfolio of less than 70%)

Step	Example
Step 1: The Initial Reference Level of Gold is determined on the Start Date.	920
Step 2: The Final Reference Level of Gold is determined on the Observation Date. The Final Reference Level is the Reference Level of Gold on the Observation Date, as determined by the Calculation Agent in its discretion.	1,535
Step 3: The Reference Asset Return is calculated. The Reference Asset Return is the lower of: (a) (Final Reference Level – Initial Reference Level) / Initial Reference Level (expressed as a percentage) = (1,535 – 920) / 920 = 66.85% and (b) 70.00% In this example, the Reference Asset Return is **66.85%**	66.85%
Step 4: The Strategy Portfolio Return is calculated, which is the Reference Asset Return multiplied by the Participation Rate. This can be expressed by the formula: Reference Asset Return x Participation Rate (expressed as a percentage) In this example, the Strategy Portfolio Return is **66.85%** (66.85% x 100%)	66.85%

Section 4: What happens at maturity? (cont).

Example 4

(assumes an increase in the Underlying Portfolio of more than 70%)

Step	Example
Step 1: The Initial Reference Level of Gold is determined on the Start Date.	920
Step 2: The Final Reference Level of Gold is determined on the Observation Date. The Final Reference Level is the Reference Level of Gold on the Observation Date, as determined by the Calculation Agent in its discretion.	1,879
Step 3: The Reference Asset Return is calculated. The Reference Asset Return is the lower of: (a) (Final Reference Level – Initial Reference Level) / Initial Reference Level (expressed as a percentage) = (1,879 – 920) / 920 = 104.24% and (b) 70.00% In this example, the Reference Asset Return is **70.00%**	70.00%
Step 4: The Strategy Portfolio Return is calculated, which is the Reference Asset Return multiplied by the Participation Rate. This can be expressed by the formula: Reference Asset Return x Participation Rate (expressed as a percentage) In this example, the Strategy Portfolio Return is **70.00%** (70.00% x 100%)	70.00%

Strategy 3

On the Maturity Date, the Strategy Portfolio Return is calculated in accordance with the steps set out below.

Example 5

Step	Example		
	Hang Seng China Enterprises Index	**TAIEX Index**	**KOSPI 200 Index**
Step 1: The Initial Reference Level for each Reference Asset is determined on the Start Date.	11,050	6,630	186
Step 2: The Final Reference Level for each Reference Asset is determined on the Observation Date. The Final Reference Level is the Reference Level of the Hang Seng China Enterprises Index, TAIEX Index and KOSPI 200 Index on the Observation Date, as determined by the Calculation Agent in its discretion.	19,698	8,810	310
Step 3: The Reference Asset Return for each Reference Asset is calculated. The Reference Asset Return is calculated as: (Final Reference Level – Initial Reference Level) / Initial Reference Level (expressed as a percentage) In this example, the Reference Asset Return for each Reference Asset is:	78.26%	32.88%	66.67%
Hang Seng China Enterprises Index (19,698 – 11,050) / 11,050 **= 78.26%**	TAIEX Index (8,810 – 6,630) / 6,630 **= 32.88%**	KOSPI 200 Index (310 – 186) / 186 **= 66.67%**	
Step 4: The Strategy Portfolio Return is calculated, which is the weighted average of the Reference Asset Returns multiplied by the Participation Rate. The weighting for each Reference Asset are:		61.16%	

Reference Asset	**Weighting**
Hang Seng China Enterprises Index	40%
TAIEX Index	30%
KOSPI 200 Index	30%

This can be expressed by the formula:

[(Reference Asset Return for Hang Seng China Enterprises Index x weighting for Hang Seng China Enterprises Index) + (Reference Asset Return for TAIEX Index x weighting for TAIEX Index) + (Reference Asset Return for KOSPI 200 Index x weighting for KOSPI 200 Index)] x Participation Rate (expressed as a percentage)

Hang Seng China Enterprises Index	TAIEX Index	KOSPI 200 Index
= 78.26% x 40% **= 31.30%**	= 32.88% x 30% **= 9.86%**	= 66.67% x 30% **= 20.00%**

In this example, the Strategy Portfolio Return is **61.16%** ((31.30% + 9.86% + 20.00%) x 100%)

Section 4: What happens at maturity? (cont).

4.2 Calculating the Maturity Value

The Strategy Maturity Value is calculated using the Strategy Portfolio Return. If you choose to invest in more than one Strategy, each Strategy Maturity Value is summed to determine the Maturity Value.

In respect of Strategy 1 and Strategy 2, any coupon payment which is received during the Investment Term is in addition to the Maturity Value.

In the examples below, we assume you have chosen to invest in all three Strategies for the amounts below. The Strategy Capital Protection Amount is also stated below.

	Strategy Investment Amount	Strategy Capital Protection Amount
Strategy 1	$20,000.00	$20,000.00
Strategy 2	$20,000.00	$20,000.00
Strategy 3	$20,000.00	$16,000.00
Investment Amount	**$60,000.00** ($20,000.00 + $20,000.00 + $20,000.00)	
Total Capital Protection Amount	**$56,000.00** ($20,000.00 + $20,000.00 + $16,000.00)	

Example 6

This example assumes an Investment in all three Strategies and assumes a positive return for each Strategy.

The Strategy Portfolio Returns are:

Strategy 1: 61.55%

Strategy 2: 70.00%

Strategy 3: 61.16%

The Strategy Maturity Values are below.

Strategy 1 is the greater of:

(a) your Strategy Investment Amount + (your Strategy Investment Amount x Strategy Portfolio Return)
= $20,000.00 + ($20,000.00 x 61.55%)
= $20,000.00 + $12,310.00
= $32,310.00

and

(b) your Strategy Capital Protection Amount
= $20,000.00

In this example, if you invested $20,000 in Strategy 1, the Strategy Maturity Value would be $32,310.00.

Strategy 2 is the greater of:

(a) your Strategy Investment Amount + (your Strategy Investment Amount x Strategy Portfolio Return)
= $20,000.00 + ($20,000.00 x 70.00%)
= $20,000.00 + $14,000.00
= $34,000.00

and

(b) your Strategy Capital Protection Amount
= $20,000.00

In this example, if you invested $20,000 in Strategy 2, the Strategy Maturity Value would be $34,000.00.

Strategy 3 is the greater of:

(a) your Strategy Investment Amount + (your Strategy Investment Amount x Strategy Portfolio Return)
= $20,000.00 + ($20,000.00 x 61.16%)
= $20,000.00 + $12,232.00
= $32,232.00

and

(b) your Strategy Capital Protection Amount
= $16,000.00

In this example, if you invested $20,000 in Strategy 3, the Strategy Maturity Value would be $32,232.00.

The Maturity Value of your Investment is the sum of each Strategy Maturity Value.

Maturity Value = $32,310.00 + $34,000.00 + $32,232.00
= $98,542.00

Therefore, the Maturity Value of your Investment is $98,542.00.

Result: You would receive your Investment Amount and the capital growth generated over the term. Depending on your choice, you will receive either physical delivery of the Delivery Parcel to the value of $98,542.00, or a cash payment (the Sale Proceeds) of $98,542.00. If you choose to receive Sale Proceeds, the Brokerage Fee will be charged to you separately.

Example 7

This example assumes an Investment in all three Strategies and assumes a 0.00% return for each Strategy.

The Strategy Portfolio Returns are:

Strategy 1: 0.00%

Strategy 2: 0.00%

Strategy 3: 0.00%

The Strategy Maturity Values are below.

Strategy 1 is the greater of:

(a) your Strategy Investment Amount + (your Strategy Investment Amount x Strategy Portfolio Return)
= $20,000.00 + ($20,000.00 x 0.00%)
= $20,000.00 + $0.00
= $20,000.00

and

(b) your Strategy Capital Protection Amount
= $20,000.00

In this example, if you invested $20,000 in Strategy 1, the Strategy Maturity Value would be $20,000.00.

Section 4: What happens at maturity? (cont).

Strategy 2 is the greater of:

(a) your Strategy Investment Amount + (your Strategy Investment Amount x Strategy Portfolio Return)
= $20,000.00 + ($20,000.00 x 0.00%)
= $20,000.00 + $0.00
= $20,000.00

and

(b) your Strategy Capital Protection Amount
= $20,000.00

In this example, if you invested $20,000 in Strategy 2, the Strategy Maturity Value would be $20,000.00.

Strategy 3 is the greater of:

(a) your Strategy Investment Amount + (your Strategy Investment Amount x Strategy Portfolio Return)
= $20,000.00 + ($20,000.00 x 0.00%)
= $20,000.00 + $0.00
= $20,000.00

and

(b) your Strategy Capital Protection Amount
= $16,000.00

In this example, if you invested $20,000 in Strategy 3, the Strategy Maturity Value would be $20,000.00.

The Maturity Value of your Investment is the sum of each Strategy Maturity Value.

Maturity Value = $20,000.00 + $20,000.00 + $20,000.00
= $60,000.00

Therefore, the Maturity Value of your Investment is $60,000.00.

Result: There would not be any capital growth in your Investment. You would receive your Investment Amount back for all three Strategies. Depending on your choice, you will receive either physical delivery of the Delivery Parcel to the value of $60,000.00, or a cash payment (the Sale Proceeds) of $60,000.00. If you choose to receive Sale Proceeds, the Brokerage Fee will be charged to you separately.

Example 8

This example assumes an Investment in all three Strategies and assumes a negative return for each Strategy.

The Strategy Portfolio Returns are:

Strategy 1: -10.00%
Strategy 2: -20.00%
Strategy 3: -35.00%

The Strategy Maturity Values are below.

Strategy 1 is the greater of:

(a) your Strategy Investment Amount + (your Strategy Investment Amount x Strategy Portfolio Return)
= $20,000.00 + ($20,000.00 x -10.00%)
= $20,000.00 + (-$2,000.00)
= $18,000.00

and

(b) your Strategy Capital Protection Amount
= $20,000.00

In this example, if you invested $20,000 in Strategy 1, the Strategy Maturity Value would be $20,000.00.

Strategy 2 is the greater of:

(a) your Strategy Investment Amount + (your Strategy Investment Amount x Strategy Portfolio Return)
= $20,000.00 + ($20,000.00 x -20.00%)
= $20,000.00 + (-$4,000.00)
= $16,000.00

and

(b) your Strategy Capital Protection Amount
= $20,000.00

In this example, if you invested $20,000 in Strategy 2, the Strategy Maturity Value would be $20,000.00.

Strategy 3 is the greater of:

(a) your Strategy Investment Amount + (your Strategy Investment Amount x Strategy Portfolio Return)
= $20,000.00 + ($20,000.00 x -35.00%)
= $20,000.00 + (-$7,000.00)
= $13,000.00

and

(b) your Strategy Capital Protection Amount
= $16,000.00

In this example, if you invested $20,000 in Strategy 3, the Strategy Maturity Value would be $16,000.00.

The Maturity Value of your Investment is the sum of each Strategy Maturity Value.

Maturity Value = $20,000.00 + $20,000 + $16,000.00
= $56,000.00

Therefore, the Maturity Value of your Investment is $56,000.00.

Result: You would have made a capital loss of $4,000. Your Investment of $20,000 in each of Strategy 1 and Strategy 2 was 100% capital protected at maturity, but your Investment of $20,000 in Strategy 3 was only 80% capital protected at maturity. Depending on your choice, you will receive either physical delivery of the Delivery Parcel to the value of $56,000.00, or a cash payment (the Sale Proceeds) of $56,000.00. If you choose to receive Sale Proceeds, the Brokerage Fee will be charged to you separately.

C Capital Investment Loan and Interest in Advance Loan (continued...)

OPTIONAL

SECTION C2: RISK DISCLOSURE

Risk statement for Loan Applicants

Before you apply for a Capital Investment Loan and an Interest in Advance Loan (if applicable), you must consider:

- whether the Loans are right for you; and
- the risks associated with the Loans; and
- the risks involved in investing in Capital Series *Trio* in which you are applying the proceeds of the Loans.

We strongly suggest that you obtain independent legal, tax and financial advice to get a better idea of the risks involved and the way in which you can manage the Loans.

You and your advisers should be aware of the following risks:

- borrowing money to invest in a Capital Series *Trio* (gearing) can magnify the financial effect on you of any decrease in the value of your investment in Capital Series *Trio*;
- income from your investments (if any) may fluctuate. Also, the time at which you pay interest on your Loan Account may be different from the time at which you can earn income on your investment;
- repayment of any part of the Loans before the Final Maturity Date which can occur through your decision or your default may result in significant costs being payable by you to us;
- the Terms and Conditions of the Loan as they apply to you and the choices you make may have significant tax implications for you.

There may be circumstances in which we can require you to pay all of what you owe to us immediately. Those circumstances include where:

- you fail to pay any sum payable by you to us on the date the payment is due;
- we consider that your financial position has deteriorated to a point where you may not be able to meet any obligation you owe to us.

You should familiarise yourself with the other circumstances in which we can ask you to pay us immediately (for example, see Clause 8 to Clause 10 and Clause 12 of the Loan Agreement).

You should obtain independent legal, tax, and financial advice on the effect on your investment, tax and financial obligations if the Loans are repaid early.

Payments to Loan Account

If we accept your application for a Capital Investment Loan, you will have a Capital Investment Loan Account ("CIL Loan Account"). If we accept your application for an Interest in Advance Loan you will have an Interest in Advance Loan Account ("IAL Loan Account").

Other than when we require you to pay your CIL Loan Account in full, we do not require you to make any principal payments on your CIL Loan Account. If you have an IAL Loan Account we require you to make principal and interest payments on your IAL Loan Account. The amount you owe to us can increase with unpaid interest and unpaid fees and charges we debit to your CIL Loan Account and your IAL Loan Account (if applicable).

We charge interest on the debit balance of your Loan Account. The balance of your Loan Account may increase with unpaid interest, fees and charges sufficient to require us to terminate the Loan Account.

Taxation

You should speak to an independent taxation adviser to determine whether you can deduct part of the interest incurred by you on your Loan Account. If you have an Interest in Advance Loan we require you to make principal and interest payments on your loan. Depending on your individual circumstances, some or all of the interest otherwise deductible might be disallowed by the Australian Tax Office.

You have sole responsibility for deciding to invest in Capital Series *Trio* for which this Loan is supplied. We do not:

- recommend Capital Series *Trio*; or
- give any opinion on the performance of Capital Series *Trio*, even if we are willing to lend money against Capital Series *Trio*.

You may wish to negatively gear investments you make with loan proceeds, however, it may not be possible to do so.

I / We have read and understood the Risk Disclosure Statement appearing above.

Supplementary Product Disclosure Statement
Capital Series *Trio*

Determined to be different

This document is a Supplementary Product Disclosure Statement to the Product Disclosure Statement (PDS) of two parts (Part 1 and Part 2) dated 7 September 2009 for the offer of Capital Series *Trio* investments.

The issuer of the PDS and this Supplementary Product Disclosure Statement is Commonwealth Bank of Australia (ABN 48 123 123 124, AFSL 234945).

This Supplementary Product Disclosure Statement should be read together with the PDS. Investors who are considering applying should note the following when considering the PDS.

Investors may borrow money for the purpose of funding an investment in Capital Series *Trio* (whether via a Capital Investment Loan, Interest in Advance Loan or other borrowed funds).

The Australian Taxation Office (ATO) has not made any public determination or ruling as to whether interest expenses incurred in relation to deferred purchase agreements (DPAs) will be deductible. Industry discussions have recently commenced, seeking clarification on this issue. Those discussions are ongoing. However, several factors have been identified that may impact on the ATO's approach to deductions claimed for interest expenses incurred in relation to DPAs.

You should be aware of these factors if you are considering borrowing money for an investment in Capital Series *Trio* (whether via a Capital Investment Loan, Interest in Advance Loan or other borrowed funds). These factors include (but are not limited to):

- which Strategy or Strategies you choose to invest in;
- the basis upon which the relevant Strategy pays any coupons during the Term of Capital Series *Trio* and whether the required conditions for receiving any coupons are met;
- whether you have the intention to take physical delivery of the Delivery Asset and hold the Delivery Asset for the purpose of deriving assessable income; and
- your personal circumstances.

The ATO may take the view that interest expenses incurred in an income year in relation to DPAs may only be deductible up to the amount of any income derived from the investment in that income year and that any interest paid in excess of the income derived may be non-deductible and should instead be included in the cost base of the Investment (which is relevant to calculating a capital gain only). However, there are alternative views to this. You should seek your own independent tax advice to determine whether an investment in Capital Series *Trio* is suitable for you.

Some information regarding taxation implications of an investment in Capital Series *Trio* is contained in Section 2.9 and Section 3.10 in Part 1 of the PDS. Section 4 in Part 1 of the PDS also contains a Tax Opinion from Greenwoods & Freehills Pty Limited. When reading these sections of PDS, you should also consider the information in this Supplementary Product Disclosure Statement.

PLEASE PROPERLY COMPLETE AND SIGN THE ACKNOWLEDGEMENT NOTICE SET OUT IN ANNEXURE A OF THIS SUPPLEMENTARY PRODUCT DISCLOSURE STATEMENT AND RETURN IT WITH YOUR COMPLETED APPLICATION FORM. WE WILL NOT ACCEPT ANY APPLICATION FORMS WHICH DO NOT INCLUDE THE PROPERLY SIGNED AND COMPLETED ACKNOWLEDGEMENT NOTICE.

Should you have any questions regarding this Supplementary Product Disclosure Statement, please contact your adviser or call us on 13 15 20.
