

## Access over 170 international markets with the security of a capital guarantee

Recent months have seen a divergence of opinion on the state of local and global markets. Some suggest that an end to the global financial crisis is near, particularly as there has been some improvement in stock market performance and economic data. Others fear that we are in the midst of a 'bear market rally' – a temporary improvement in prices and sentiment that is followed by a more severe downturn.

Although today's outlook is uncertain, alternative investments can benefit in this environment. Investment strategies that have historically demonstrated the ability to capture profits in both rising and falling markets, such as the AHL Diversified Program, may therefore be attractive to investors.

Man OM-IP 3AHL will access the AHL Diversified Program, an investment strategy with over 18 years of history and a compound annual return of 16.0% since inception<sup>^</sup>.

**Performance:** aims to generate medium to long term capital growth\* in both rising and falling markets.

**Security:** the Westpac Guarantee<sup>+</sup>.

**Diversification:** low correlation with the performance of investments in stocks, property and bonds<sup>~</sup>.

An investment in Shares is subject to the key risks described in Section 4 of the Prospectus. Investors should carefully read all of the Prospectus and seek advice from a licensed financial advisor before making an investment decision.

**CAPITAL GUARANTEE BY:**  
(Subject to the terms of the Westpac Guarantee as described in Section 5 and set out in Appendix A of the Prospectus)
